Where are the breweries clustering?

A visual look at state vs. national activity and hotspots.

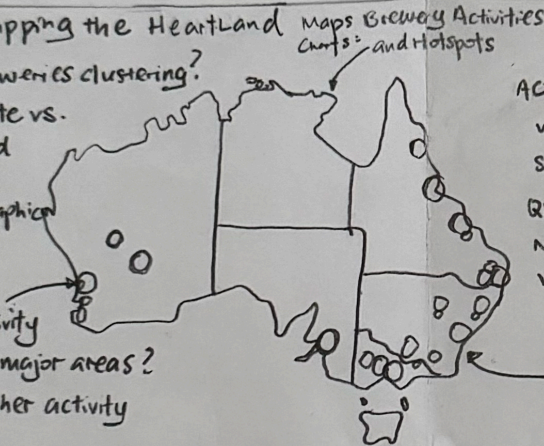

= at least one geographic map (Vega-Lite)

Bubble Map:

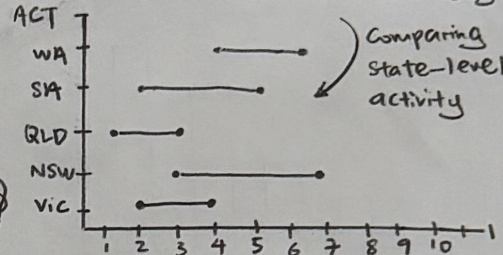

Brewery Count/Activity

• Focus on cities and major areas?

• More bubbles = higher activity

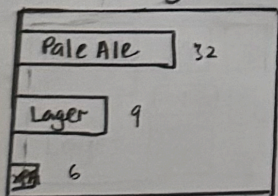

Dumbbell Chart: Beers vs. Breweries by State

Comparing state-level activity

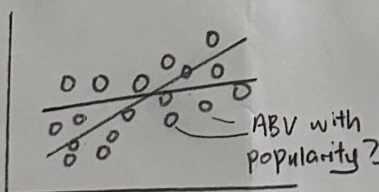

SECTION 3 - What makes a hottest 100 beer?

Bar Chart: Style Breakdown

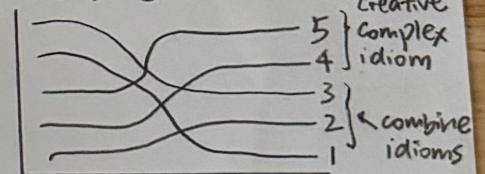

H100 data: Popularity of Top beer styles

Scatter Plot: ABV vs Votes/Ranking

• Correlate ABV with Rating vs Votes?
• entries from H100

Bump Chart: Brewer Rank Change over Time

Consistency of top brewers in H100?

SECTION 4 - The Final Verdict: Craft vs. Commercial

Conclusion:

Synthesising the analysis...

Overall impact and a state-by-state

[Australia's palate is evolving. While

national trends remain rooted in

traditional wine and beer, the GABS 100

reveals a clear shift toward regional,

independent diversity, driven by NSW and

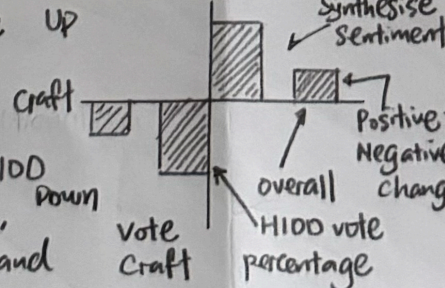

Victoria. We moving away from mass production

toward a culture that values local innovation

and 'Hazy' craft styles.]
